### Auto-Adjust

The BESSEY® Auto-Adjust Toggle Clamp automatically adjusts to variations in work piece dimensions while maintaining constant clamping force. No more time-consuming manual adjustment of the spindle height to maintain safe and correct clamping force. The removable non-marring plastic cap is included on the 7/8" diameter pads.

### Adjustable clamping force

The integrated clamping force adjustment screw can be used to create an actually applied clamping force from 25 to 550 lbs. (max holding capacity 700 lbs.) One BESSEY® Auto-Adjust Toggle Clamp can replace a range of competitive clamps.

### Adaptable base plate

The large (2 1/4" by 2 1/2") flanged base is designed for use with 1/4" or M6 fasteners. Mounting holes are sized & spaced for easy mounting and versatility.

### Extra large handle

The large 1" x 2 1/8" handle offers greater user comfort and ease of operation.

## Step-Over steel clamps

- The return rail lets the J clamp "step-over" the lip on channel iron, angle-iron, I-beam or other obstructions
- High-strength electro-galvanized sliding pin T-handle - rounded ends for comfort, size engineered to load capacity
